#### Petunjuk Pengisian

1. Semua pernyataan mohon di jawab sesuai dengan keadaan sebenarnya
2. Berilah tanda centang (√) pada kolom yang tersedia dengan jawaban yang dianggap sesuai keadaan diri anda.

#### III. Pengetahuan

| No | Pernyataan                                                                                                                                                                     | Ya | Tidak |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|-------|
| 1  | Keluarga berencana (KB) adalah cara untuk menghindari kelahiran yang tidak diinginkan, mengatur interval (jarak) diantara kehamilan dan menentukan jumlah anak dalam keluarga. |    |       |
| 2  | Yang termasuk metode kontrasepsi jangka panjang adalah IUD, implant, steril.                                                                                                   |    |       |
| 3  | 1 bulan setelah melahirkan adalah waktu yang baik untuk menggunakan alat kontrasepsi                                                                                           |    |       |
| 4  | Tujuan dari Keluarga Berencana (KB) adalah meningkatkan derajat kesehatan ibu, anak serta keluarga.                                                                            |    |       |
| 5  | Metode kontrasepsi sederhana adalah suatu cara yang dapat dikerjakan sendiri oleh ibu tanpa memerlukan bantuan dari tenaga kesehatan                                           |    |       |
| 6  | Gangguan kesehatan yang biasa timbul karena pemasangan kontrasepsi adalah tubuh mudah merasakan kelelahan                                                                      |    |       |

|    |                                                                                                                                                                     |  |  |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|
|    | karena aktifitas hormonal dalam tubuh                                                                                                                               |  |  |
| 7  | Implan dapat digunakan selama maksimal 3 tahun                                                                                                                      |  |  |
| 8  | Keluarga Berencana (KB) dapat meningkatkan kelahiran dan meningkatkan jumlah penduduk.                                                                              |  |  |
| 9  | Menggunakan alat kontrasepsi pada Wanita bisa menyebabkan penambahan berat badan                                                                                    |  |  |
| 10 | Jika ibu lupa tidak minum pil KB 1 kali, maka cara minum pil berikutnya adalah diminum jadi satu dengan hari berikutnya                                             |  |  |
| 11 | Hal yang perlu diperhatikan untuk pemasangan kontrasepsi ialah harus disetujui oleh pasangan dan dipasang oleh tenaga kesehatan profesional                         |  |  |
| 12 | Hal yang perlu diperhatikan setelah pemasangan kontrasepsi ialah Langsung ke fasilitas kesehatan apabila mengalami gangguan kesehatan karena pemasangan kontrasepsi |  |  |
| 13 | IUD adalah Kontrasepsi yang pemasangannya dilakukan dengan memasukkan spiral kedalam alat kelamin perempuan                                                         |  |  |
| 14 | Efek samping yang biasanya muncul dalam penggunaan IUD ialah Perasaan tidak nyaman karena adanya benda asing yang masuk ke tubuh                                    |  |  |
| 15 | Implan adalah kontrasepsi yang pemasangannya dilakukan dengan memasukkan susuk kedalam bagian kulit dibawah lengan                                                  |  |  |

#### IV. Sikap

| No | Pernyataan                                                                                                                                                 | Setuju | Tidak Setuju |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|--------------|
| 1  | Bagaimana pendapat ibu dengan pendapat yang mengatakan “banyak anak banyak rejeki”                                                                         |        |              |
| 2  | Pemilihan metode kontrasepsi yang digunakan harus dikonsultasikan bersama pasangan dan tenaga kesehatan                                                    |        |              |
| 3  | Tidak akan terjadi permasalahan kesehatan berkaitan dengan pemasangan kontrasepsi, apabila dipasang secara benar dan sesuai oleh tenaga kesehatan terlatih |        |              |
| 4  | Pemasangan kontrasepsi seperti implant, IUD efektif mencegah kehamilan dalam rentang waktu 5 tahun sampai dengan seumur hidup                              |        |              |
| 5  | Ibu menggunakan kontrasepsi karena sudah berkonsultasi dengan petugas Kesehatan                                                                            |        |              |
| 6  | Penting untuk menjaga kesehatan reproduksi dengan mencegah kehamilan menggunakan kontrasepsi                                                               |        |              |

|    |                                                                                                         |  |  |
|----|---------------------------------------------------------------------------------------------------------|--|--|
| 7  | Kontrasepsi tidak menimbulkan efek samping bagi pemakaiannya                                            |  |  |
| 8  | Penggunaan kontasepsi tidak mebuat berat badan saya bertambah berat                                     |  |  |
| 9  | Pemasangan kontasepsi tidak akan mengganggu keharmonisan keluarga dalam hal pemenuhan kebutuhan seksual |  |  |
| 10 | Keluarga menjadi lebih terurus apabila menggunakan kontasepsi                                           |  |  |

#### V. Dukungan Tenaga Kesehatan

| No | Pernyataan                                                                                                                                               | Ya | Tidak |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------|----|-------|
| 1  | Petugas kesehatan memberikan informasi yang baik dan mencukupi mengenai kontrasepsi                                                                      |    |       |
| 2  | Petugas kesehatan memberikan motivasi yang baik agar ibu menggunakan kontrasepsi kontrasepsi                                                             |    |       |
| 3  | Petugas kesehatan memiliki kemampuan yang profesional dalam hal penggunaan kontrasepsi kontrasepsi                                                       |    |       |
| 4  | Petugas kesehatan mampu merahasiakan privasi pasien dalam penggunaan kontrsepsi                                                                          |    |       |
| 5  | Petugas kesehatan memiliki sikap, pola komunikasi, serta sopan santun yang baik pada pasien, sehingga membuat pasien nyaman dalam penggunaan kontrasepsi |    |       |
| 6  | Petugas kesehatan memiliki empati yang baik kepada pasien dalam hal penggunaan kontrasepsi                                                               |    |       |
| 7  | Petugas kesehatan menyediakan layanan kesehatan yang paling optimal untuk melayani pasien dalam penggunaan kontasepsi                                    |    |       |
| 8  | Petugas kesehatan memfasilitasi dalam hal pelatihan dan penyuluhan tentang penggunaan kontrasepsi                                                        |    |       |
| 9  | Petugas Kesehatan sering mengingatkan saya menggunakan kontrasepsi                                                                                       |    |       |
| 10 | Petugas kesehatan selalu memberi semangat                                                                                                                |    |       |

#### Variabel Dependent

1. Apakah ibu menggunakan kontrasepsi?

Ya ☐

Tidak ☐
